Easy start guide
SolidusKey.com
Physical PulseChain Crypto Coin

Welcome to PulseChain!
- Congrats on getting your SolidusKey PulseChain ColdStorageCoin.

This coin is a crypto collectible and a starting point for being self-taught. This coin is not meant for serious investment or to hold any amount of money you're not willing to lose. For best practice security, order a Trezor™ hardware wallet where you create your own private key. "Not your keys, not your coins." Beware imposters. We will never contact you.

- Buy a Trezor™ hardware wallet for storing any significant amount of crypto
- https://trezor.go2cloud.org/SH91 (a referral link supporting coin creator).

How to Fund the Coin or Trezor
- Buy PulseChain coins (PLS) to store on your physical coin: up to ~$1,400 via ChangeNow.io/buy/pulse
- See bridge option under Advanced Options

How to Redeem
- Redeem by correctly typing the private key under the sticker into MetaMask.io (import key)
- Add PulseChain.com network settings, swap for ETH on Piteas.io
- Use bridge.PulseChain.com to send to ETH network
- Create a Coinbase or Kraken account to send your ETH to and sell for USDC to put in your bank.

> GIFT A COIN – ORDER MORE AT
> **SOLIDUSKEY.COM**

ADVANCED OPTIONS
- Set up a Metamask.io or Rabby.io wallet on your phone or computer Google Chrome browser extension.

Write down the 12 or 24 words in two places. Never share them with anyone. Seed words are a type of private key like under the coin sticker. Connect the Trezor if you have it. Only order Trezor from my official link.

- Add network settings at **PulseChain.com**
- Set up a Coinbase.com or Kraken.com account to buy USDC or ETH to bridge
- Use **bridge.PulseChain.com** to bridge USDC or ETH. Sometimes you're gifted 3,369 PLS by PulseCoinList.com to run your first transactions, others times you'll have to buy wPLS on ETH and bridge that over.
- Swap USDC or ETH to PLS (and PLSX if you want) at app.Piteas.io (aggregator) or Pulsex.com (most liquid DEX).
- Track your holdings: **GoPulse.com/Portfolio**, enter public address (0x...) of coin or Trezor/MetaMask
- Time-lock any token to pay your future self:
- https://TimePays.me Tutorial: x.com/TimePaysMe
- Custom PNS Domains (DeFi LinkTree):
- https://Pulse.domains
- Stake HEX HexScout.com
- Yield Farm (for advanced users only) at PulseX.com (most liquid DEX) or 9inch.io (MEME DEX)

JOIN THE PULSECHAIN COMMUNITY
PulseChain is a decentralized community like Bitcoin. There is not 1 leader or organization, but many individuals who volunteer to teach others. Never share your private key and enjoy joining the many sub-communities on PulseChain!

SolidusKey:

Easy Onboarding and Enlightenment, Designed with Past and Future in Mind

SolidusKey.com

WELCOME TO SOLIDUSKEY.COM

In your hands, you hold a piece of history reimagined for the digital age. The SolidusKey is not just a product; it's a testament to the enduring principles of trust, security, and value that have transcended millennia. Let us take you on a journey through time, from the ancient Byzantine Empire to the forefront of modern cryptocurrency.

THE LEGACY OF THE SOLIDUS

The Solidus coin was introduced by Emperor Constantine I in 312 AD and became the cornerstone of the Byzantine Empire's economy. Renowned for its stability and intrinsic value, the Solidus was minted in pure gold and became a trusted medium of exchange across continents. It symbolized economic strength and reliability, fostering trade and prosperity for over 700 years.

THE BYZANTINE GENERALS' PROBLEM

Fast forward to the digital era, and we encounter a different kind of Byzantine problem. Computer scientists named a classic dilemma in distributed computing after the Byzantine generals' need for trust. The Byzantine Generals' Problem illustrates the challenge of achieving consensus in a distributed network. How can disparate nodes (or generals) communicate securely and reliably to reach a unanimous decision, even if some nodes may fail or act maliciously?

THE SOLUTION:
BITCOIN AS THE FIRST DIGITAL GOLD

In 2008, an anonymous entity known as Satoshi Nakamoto introduced Bitcoin, a revolutionary digital currency that elegantly solved the Byzantine Generals' Problem. By utilizing a decentralized ledger (blockchain) and cryptographic proofs, Bitcoin ensured secure, transparent, and immutable transactions without the need for a trusted central authority. This innovation marked the dawn of a new era in finance and technology, echoing the trust and security once embodied by the Solidus coin.

SOLIDUSKEY:
BRIDGING THE PAST AND THE FUTURE

Having evidence above decree worked to prove the value of the SolidUs gold coins and the value of Bitcoin. SolidusKey.com draws inspiration from these profound historical and technological milestones. Our physical metal coin, with its crypto key laser-etched onto its surface, is designed to be the best starting point for PulseChain—a decentralized network for smart contracts and low fees—a system-state fork of Ethereum. It merges the provenance of physical gold with the tech needed for digital value and utility.

FEATURES OF SOLIDUSKEY

- Inscription: Each coin bears the inscription "EVIDENTIA SUPRA FIAT," a Latin phrase that translates to "Evidence Above Decree." This inscription encapsulates the philosophy that the transparency and cryptographic proof inherent in cryptocurrency surpass the arbitrary value assigned to traditional fiat currencies by governmental decree.

- Historic: The manufacturer of SolidusKey coins is Bobby Gray of ColdStorageCoins.com. He invented the Bitcoin logo (coin with large B and circuit board background) that is recognized by over a billion people worldwide.

- Laser-Etched Crypto Key: Each coin is uniquely etched with your private crypto key, ensuring that your coin is much more than a beautiful metal collectible—it can contain digital value too.

- Ease of Use: Made to withstand the test of time, the SolidusKey coin is both a keepsake and an excellent starting point. You can hand someone a coin you loaded with PLS, and they are instantly onboarded. Or you can solve the puzzle of onboarding yourself by following our instruction guide.

WHY SOLIDUSKEY?

- "Satori": In an increasingly digital world, SolidusKey provides a physical manifestation of your cryptocurrency. A physical Bitcoin brand that ended in 2017 was named "Satori"—which is the Japanese term for "a spiritual enlightenment"— an "ah ha! moment" that occurs when you combine the presence of physical and digital value.

- Concrete Starting Point: Just as the Solidus was evidence of value for ancient traders, SolidusKey instills concrete confidence in starting your journey to realize digital value.

- Symbolism: By combining the best of ancient wisdom and modern innovation, SolidusKey stands as a symbol of enduring value and technological advancement.

THANK YOU FOR CHOOSING SOLIDUSKEY.

As you integrate this unique product into your crypto journey, remember that you are part of a legacy that spans centuries—a legacy of value, evidence, and innovation. Welcome to the future of digital value, anchored in the timeless principles of a solid past.

YOUR GUIDE TO BITCOIN

SAFETY & BEST PRACTICES

WELCOME TO THE EXCITING WORLD OF DIGITAL CURRENCY:

Bitcoin & blockchain-based digital currencies represent a bold new phase in the evolution of money & banking. For the first time in generations, cryptocurrency participants have demonstrated a greater level of trust in the blockchain community than in the modern banker. Seeking a brighter future, enthusiasts leave behind banking standards of fraud protection, chargeback protection, password recovery, & many other conveniences not yet available in the realm of cryptocurrencies.

In this brave new world, knowledge is power. When we developed Cold Storage Coins®, we took a hard look at common cryptocurrency problems and developed what we believe to be the easiest & safest way to own Bitcoin. We work tirelessly, so that you, our community partner, have the greatest opportunity to join & profit in the digital currency revolution. Manufacturing integrity is our top priority. Together, we can forge the future of money & value.

Please read and consider the do's and don'ts outlined in this booklet. We hope you enjoy a safe & properous experience with digital currencies & Cold Storage Coins®!

✔ DO'S:

✔ Keep your Cold Storage Coin® safe & secure.
Once you load your Cold Storage Coin®, keep it someplace safe! With Cold Storage Coins®, you're converting digital risk into physical risk; it's very important to store your Cold Storage Coin® somewhere it won't be lost or stolen.

✔ Download the Cold Storage Coins® app & track the value of your digital currencies.
The Cold Storage Coins® app is a great way to keep track of your coins & values. You can add value, redeem & set notifications based on your performance goals.

✔ Diversify.
With digital currencies rapidly developing and improving, new opportunities emerge on a regular basis. Keep up with industry news & consider spreading your eggs across multiple baskets. We make Cold Storage Coins® for many different blockchains.

✔ Look before you Leap!
There are no refunds, chargebacks or fraud protections in the world of digital currency. Chances are good a bad decision can't be undone! Exercise caution & prudence at all times.

✘ DON'TS:

✘ Buy more than you can afford to lose.
Like many other bleeding-edge technologies, the value of Bitcoin & other digital currencies is extremely volatile, and can fluctuate dozens of percent on a daily basis. No one knows what it'll be worth in 1 month or 1 year - it could be priceless, or worth nothing at all.

✘ Reuse your Cold Storage Coin®.
Your Cold Storage Coin® is an easy way to keep your digital currency safe. But once you peel off the security seal & scan the laser-etched private key, that secret info is no longer secure. Acquire a new Cold Storage Coin® and start over to keep your asset as safe as can be!

✘ Fall for scammy apps, shady exchanges & get rich quick schemes.
The more you learn about digital currency, the more exciting it is! But, there are plenty of horror stories to learn from. Even the experts fall victim from time to time. If something is new, untested or looks too good to be true, be extra careful before taking on the risk.

✘ Store your digital assets online!
Always use Cold Storage Coins® to keep assets safe when not trading online.

STEP 1 : DOWNLOAD THE APP

Available for both iOS and Android mobile operating systems, the Cold Storage Coins® app makes tracking the value of your digital assets easy and fun.

With the app, you can add value, redeem value, set price alerts, and verify the authenticity of your Cold Storage Coin®.

STEP 2 : ACTIVATE & ADD VALUE

Before you swap your cold hard cash for digital currency, we strongly encourage you to read the reverse side of this booklet and consider the Do's, Don'ts and Fine Print. Buying digital currencies, including Bitcoin, can be a lot like gambling, and is extremely risky. NEVER buy more than you are

---

willing to lose, and be prepared for your asset to lose all of its value without warning.

Now that you're holding the easiest & safest way to own Bitcoin in the palm of your hand, it's time to activate your Cold Storage Coin® and add value.

❶ Open the Cold Storage Coins® app on your mobile device. You'll need to scan the QR code on the back of the coin, so be sure to use a device with a quality camera.

❷ Touch the + in the top-right corner of the app to add your new Cold Storage Coin®.

❸ Scan the QR code on the back of the coin, located next to the 6-digit Coin ID.

Once you scan the coin, our system will immediately verify the authenticity of your Cold Storage Coin®. If our system recognizes the coin, it will display a picture of the coin in the package along with the manufacturing data. Please ensure the 6-digit Coin ID displayed in the app matches the 6 digits on your coin.

If this is your first time scanning the coin, the app will ask if you want to activate the coin and add value. Press YES if you want to proceed.

---

❹ Select the amount you want to add to the coin. Amounts are listed in United States Dollars. If you want to add an amount not shown, select "Other". The maximum amount you can add varies by location.

❺ Select CONFIRM. A confirmation screen will show the details of your Add Value transaction - including the total amount in USD, the live market price of the digital asset you are buying, the actual amount of that digital asset you will receive, our processing fee for facilitating the transaction, and a total amount due.

❻ If you are satisfied with the transaction, select CONFIRM. You will be taken to the Payment Options, where you can select one of several payment methods.

Please note that payment options and limits vary by region. Not all payment options may be available in your region, and you may choose to contact us for help in finding a payment method that works best for you.

Once your payment is complete, your coin will be funded within 30 minutes of our ability to verify your successful payment. The new balance will be shown in the app upon successful payment verification.

STEP 3: KEEP IT SAFE!

And that's it! You're holding the easiest way to own digital currency. It's offline, unhackable and designed to retain its important data for years! It's a digital asset now held safe & secure in the palm of your hand.

But BE CAREFUL! You've now converted DIGITAL risk into PHYSICAL risk. There is NO way to recover a lost or missing Cold Storage Coin®, so it's absolutely critical that you safeguard it the same way you would any other irreplaceable item, like in a safe or safe-deposit box at a trustworthy bank.

We encourage you to explore the exciting and rapidly evolving world of Bitcoin and cryptocurrency. If we can be of assistance, let us know!
